

MAYANK CHARDE

Nagpur, Maharashtra, India

mayankcharde2@gmail.com — linkedin.com/in/mayankcharde — github.com/mayankcharde

PROFESSIONAL SUMMARY

Software Engineer specializing in AI and Full Stack Development with experience in building scalable MERN applications. Proficient in LLMs, NLP, REST APIs, and payment integrations. Strong foundation in Data Structures & Algorithms with proven ability to optimize performance.

TECHNICAL SKILLS

Programming: Java, JavaScript, Python, HTML, CSS

Frameworks: React.js, Node.js, Express.js, FastAPI, Tailwind CSS

Databases: MongoDB

AI/ML: Large Language Models, NLP, Transformers, Generative AI

Tools: Git, Docker, Postman, Puppeteer, SendGrid, Razorpay, CI/CD

SOFT SKILLS

- Teamwork and Collaboration
- Project Management
- Decision Making
- Time Management
- Problem Solving
- Communication

PROFESSIONAL EXPERIENCE

MERN Stack Developer Intern — Codec Technologies India

Jun 2025 – Present

- Engineered MERN applications improving responsiveness by 35%
- Developed REST APIs serving 500+ daily requests with 99.5% uptime and <180ms latency
- Integrated Razorpay, reducing payment failures by 25% via error handling
- Automated CI/CD with Docker, cutting deployment cycles by 40%

PROJECTS

Full Stack AI Platform — github.com/mayankcharde/FINAL-DEEPSEEK2

- Built AI conversational platform with LLM/NLP integration for 100+ concurrent users
- Added JWT auth (95% security improvement) and Speech-to-Text (60% engagement increase)
- Integrated AI image generation and Razorpay subscription with 98% transaction success

Taxpayer Education Platform

- Deployed MERN app for 500+ learners with video modules
- Automated emails and certificates, reducing processing time by 70%
- Integrated Razorpay (50,000+ processed) with API testing across 25+ endpoints

Real-Time Chat Application

- Developed real-time chat platform using Socket.io with user authentication and message persistence
- Implemented group chat functionality, typing indicators, and message read receipts
- Deployed on cloud platform with auto-scaling capability handling 200+ concurrent users
- Integrated MongoDB for message storage with optimized queries for fast message retrieval

ACHIEVEMENTS

- **Beat-Bots Robotics Competition** – Third Runner Up among 20+ teams
- Optimized application performance achieving 35% faster responsiveness
- Reduced payment failures by 25% through comprehensive error handling
- Automated workflows cutting processing time by 70% for certificate generation

CERTIFICATIONS

- Generative AI Explained
- MongoDB Basics for Students
- Deloitte Australia Technology Job Simulation
- Data Structures and Algorithms in Java
- Web Development Bootcamp Certification

EDUCATION

B.Tech in Computer Science

Expected 2027

Specialization: Artificial Intelligence & Machine Learning

St. Vincent Pallotti College of Engineering and Technology, Nagpur
